

# Semir Mahovkic

SENIOR SOFTWARE ENGINEER

---

## PROFILE

Senior Software Engineer with 11+ years of experience designing high-throughput, cloud-native architectures, distributed systems, and low-latency platforms. Proven expertise in Golang, Kubernetes ecosystem, asynchronous messaging, and end-to-end application lifecycle management. Track record of delivering critical software for industry leaders, including Cisco, Sportradar, and Broadcom/VMware. Experienced in AI-assisted software development to accelerate engineering velocity.

## TECHNICAL SKILLS

|                                      |                                                                                                                                                           |
|--------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| Languages & Core                     | Golang (Gin), C# (.NET Core), TypeScript (Node), PHP (Laravel)                                                                                            |
| Messaging & Transport                | gRPC (Streams), Aeron, RabbitMQ, MQTT, Redis PubSub, AWS SQS/SNS, WebSockets, FIX Protocol                                                                |
| Cloud Native, DevOps & Observability | Kubernetes (Operators, CRDs), Docker, Helm, ArgoCD (GitOps app-of-apps pattern), Prometheus, Grafana, OpenTelemetry Collector, Loki, Jaeger, Keycloak IAM |
| Databases & Caching                  | PostgreSQL, MySQL, Redis, MongoDB, Elasticsearch, SQLite, Cassandra, ClickHouse                                                                           |

## CONTACT

|           |                                                                                                         |

07/2024 –  
11/2025

## **Evoila** — Mainz, Germany

---

### **Senior Cloud Native Engineer**

**Project** MFC (MultiFeedCenter)

**Technologies** dotnet, Kubernetes, Helm charts, ArgoCD, GCP, RabbitMQ, MongoDB, MySQL, Postgres, Claude Code

#### **Responsibilities**

- Built asynchronous .NET microservices to stream and reconcile data feed providers, improving data accuracy and reducing processing latency.
  - Designed GitOps CD pipelines via ArgoCD using the app-of-apps pattern to automate and streamline multi-service Kubernetes deployments.
  - Deployed a complete Kubernetes observability stack (Grafana, Loki, Prometheus, Elasticsearch, OpenTelemetry Collector) for distributed tracing and monitoring.
  - Configured and integrated Keycloak IAM SSO across Grafana, ArgoCD, and backend services (.NET).
- 

08/2023 –  
07/2024

## **Endava** — London, UK

---

### **Senior Software Engineer**

**Project** Sportradar

**Technologies** Golang, gRPC, Kubernetes, Redis

#### **Responsibilities**

- Implemented high-concurrency real-time data synchronization services in Golang, gRPC, and Kubernetes for sports streaming and odds distribution.
- 

08/2022 –  
07/2023

## **Endava** — London, UK

---

### **Senior Software Engineer**

**Project** CSFN (Cisco Secure Firewall Cloud Native)

**Technologies** Golang, Kubernetes, Helm charts, ArgoCD, AWS, gRPC, Postgres, Redis

#### **Responsibilities**

- Led engineering team developing Kubernetes Operators for Cisco's Cloud Native Firewall & VPN to automate lifecycle, resource management, and security policies. Integrated AWS Shield and IAM RBAC.
-

11/2021 –  
07/2022

## Endava — London, UK

### Senior Software Engineer

**Project** Agilent

**Technologies** dotnet, Typescript, Angular, Microservices, Embedded software

Custom software for Agilent's laboratory instruments, used for chemical analysis and research — from fuel and oil quality testing to cancer research.

#### Responsibilities

- Developed .NET microservices deployed on Windows Embedded hardware for laboratory instruments and Angular interfaces for custom chemical analysis workflows.

## EARLIER ROLES

06/2019 –  
11/2021

### Mistral — Sarajevo, Bosnia and Herzegovina

MTVO (Masters of Void Organization)

Developed real-time data synchronization backends using .NET, WebSockets, Redis, and AWS for virtual asset trading platforms.

dotnet, Typescript, Angular, AWS, Websockets, Redis, MSSQL

03/2018 –  
05/2019

### MOP — Sarajevo, Bosnia and Herzegovina

NAGA

Online cryptoexchange platform.

Golang, Kubernetes, RabbitMQ, Websockets, AWS, Redis, Postgres, gRPC

05/2015 –  
08/2017

### Imel d.o.o. — Lukavac, Bosnia and Herzegovina

Android + backend

Developed PHP/Laravel backends, mobile APIs, and Android applications for logistics and dental monitoring platforms.

PHP, Laravel, AngularJS, Linux, Websockets, Android, MySQL, SQLite
