

# Semir Mahovkic

SENIOR SOFTWARE ENGINEER

---

## PROFILE

Senior Software Engineer with 11+ years of experience designing high-throughput, cloud-native architectures, distributed systems, and low-latency platforms. Proven expertise in Golang, Kubernetes ecosystem, asynchronous messaging, and end-to-end application lifecycle management. Track record of delivering critical software for industry leaders, including Cisco, Sportradar, and Broadcom/VMware. Experienced in AI-assisted software development to accelerate engineering velocity.

## TECHNICAL SKILLS

|                                      |                                                                                                                                                           |
|--------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| Languages & Core                     | Golang (Gin), C# (.NET Core), TypeScript (Node), PHP (Laravel)                                                                                            |
| Messaging & Transport                | gRPC (Streams), Aeron, RabbitMQ, MQTT, Redis PubSub, AWS SQS/SNS, WebSockets, FIX Protocol                                                                |
| Cloud Native, DevOps & Observability | Kubernetes (Operators, CRDs), Docker, Helm, ArgoCD (GitOps app-of-apps pattern), Prometheus, Grafana, OpenTelemetry Collector, Loki, Jaeger, Keycloak IAM |
| Databases & Caching                  | PostgreSQL, MySQL, Redis, MongoDB, Elasticsearch, SQLite, Cassandra, ClickHouse                                                                           |

08/2023 –  
07/2024

## Endava — London, UK

---

### Senior Software Engineer

**Project** Sportradar

**Technologies** Golang, gRPC, Kubernetes, Redis

Live sports data and odds, distributed in real time to streaming and betting platforms.

#### Responsibilities

- Implemented data synchronization services in Golang, gRPC streams, and Kubernetes, keeping latency low across the sports streaming and odds distribution path.

---

08/2022 –  
07/2023

## Endava — London, UK

---

### Senior Software Engineer

**Project** CSFN (Cisco)

**Technologies** Golang, Kubernetes, Helm charts, ArgoCD, AWS, gRPC, Postgres, Redis

Cisco Secure Firewall Cloud Native — the firewall and VPN Cisco ships as an appliance, delivered instead as a Kubernetes service on AWS.

#### Responsibilities

- Led the engineering team developing Kubernetes Operators for Cisco's Cloud Native Firewall & VPN to automate lifecycle, resource management, and security policies.
- Designed an Operator that wires AWS Shield into newly deployed services.
- Tightened access control across Kubernetes RBAC and AWS IAM.

---

11/2021 –  
07/2022

## Endava — London, UK

---

### Senior Software Engineer

**Project** Agilent

**Technologies** dotnet, Typescript, Angular, Windows Embedded

Custom software for Agilent's laboratory instruments, used for chemical analysis and research — from fuel and oil quality testing to cancer research.

#### Responsibilities

- Developed .NET microservices deployed on Windows Embedded hardware inside laboratory instruments.
- Built Angular interfaces for custom chemical analysis workflows.
