WORK EXPERIENCE

11/2025 – Present	Evoila — Mainz, Germany	
	Senior Software Engineer / Infrastructure Automation Specialist	
	Project	Self-service VM provisioning on VCF Automation 9 (Broadcom Professional Services)
	Technologies	Typescript, VCF Automation 9, vRealize Orchestrator, NetBox IPAM, Claude Code
	Responsibilities	
	- Implemented a self-service VM provisioning catalog on VCF Automation 9 (formerly Aria Automation) — 20+ Orchestrator actions, workflows and configuration elements on a dynamic request form and Kubernetes-native VM deployment. - Automated IP address management against NetBox IPAM and vCenter — live IP availability, hostname generation with uniqueness validation, and event-driven IP registration after deployment (via VCF Automation subscriptions). - Improved shared, reusable TypeScript automation libraries and built a generic, strongly typed configuration layer on top of them, turning environment-specific mappings into configuration instead of code.	
07/2024 – 11/2025	Evoila — Mainz, Germany	
	Senior Cloud Native Engineer	
	Project	MFC (MultiFeedCenter)
	Technologies	dotnet, Kubernetes, Helm charts, ArgoCD, GCP, RabbitMQ, MongoDB, MySQL, Postgres, Claude Code
	Responsibilities	
	- Built asynchronous .NET microservices to stream and reconcile data feed providers, improving data accuracy and reducing processing latency. - Designed GitOps CD pipelines via ArgoCD using the app-of-apps pattern to automate and streamline multi-service Kubernetes deployments. - Deployed a complete Kubernetes observability stack (Grafana, Loki, Prometheus, Elasticsearch, OpenTelemetry Collector) for distributed tracing and monitoring. - Configured and integrated Keycloak IAM SSO across Grafana, ArgoCD, and backend services (.NET).
