

Semir Mahovkic

SENIOR SOFTWARE ENGINEER

PROFILE

11+ years of software engineering — sub-millisecond backends for TradeView Markets, Kubernetes Operators for Cisco Secure Firewall Cloud Native, real-time odds distribution for Sportradar, embedded .NET inside Agilent's laboratory instruments, and self-service VM provisioning on VMware's VCF Automation. Golang, .NET and TypeScript in production, much of it cloud-native.

End-to-end ownership — code, build, deploy, monitor.

TECHNICAL SKILLS

Languages & Core	Golang (Gin), C# (.NET Core), TypeScript (Node), PHP (Laravel)
Messaging & Transport	gRPC (Streams), Aeron, RabbitMQ, MQTT, Redis PubSub, AWS SQS/SNS, WebSockets, FIX Protocol
Cloud Native, DevOps & Observability	Kubernetes (Operators, CRDs), Docker, Helm, ArgoCD (GitOps app-of-apps pattern), Prometheus, Grafana, OpenTelemetry Collector, Loki, Jaeger, Keycloak IAM
Databases & Caching	PostgreSQL, MySQL, Redis, MongoDB, Elasticsearch, SQLite, Cassandra, ClickHouse

WORK EXPERIENCE

11/2025 – Present	Evoila — Mainz, Germany	
	Senior Software Engineer — Cloud & Infrastructure Automation	
	Project	Self-Service VM Provisioning on VCF Automation 9 (Broadcom Professional Services)
	Technologies	TypeScript, VCF Automation 9, vRealize Orchestrator, NetBox IPAM, Claude Code
	VMware's private-cloud automation platform — a self-service catalog where customers request and provision their own VMs.	
	Responsibilities	
	- Implemented a self-service VM provisioning catalog item on VCF Automation 9 (formerly Aria Automation) — a dynamic request form backed by 20+ Orchestrator actions, workflows, and configuration elements, driving Kubernetes-native VM deployment. - Automated IP address management against NetBox IPAM and vCenter — live IP availability, hostname generation with uniqueness validation, and event-driven IP registration after deployment (via VCF Automation subscriptions). - Improved shared, reusable TypeScript automation libraries and built a generic, strongly typed configuration layer on top of them.	
07/2024 – 11/2025	Evoila — Mainz, Germany	
	Senior Cloud Native Engineer	
	Project	MFC (MultiFeedCenter)
	Technologies	.NET, Kubernetes, Helm charts, ArgoCD, GCP, RabbitMQ, MongoDB, MySQL, Postgres, Claude Code
	Third-party data feeds ingested from many providers and reconciled into a single stream for downstream consumers.	
	Responsibilities	
	- Built asynchronous .NET microservices to stream and reconcile feeds from third-party providers, improving data accuracy and reducing processing latency. - Designed GitOps CD pipelines via ArgoCD using the app-of-apps pattern to automate and streamline multi-service Kubernetes deployments. - Deployed a complete Kubernetes observability stack (Grafana, Loki, Prometheus, Elasticsearch, OpenTelemetry Collector) for distributed tracing and monitoring. - Configured and integrated Keycloak IAM SSO across Grafana, ArgoCD, and backend services (.NET).	

08/2023 –
07/2024

Endava — London, UK

Senior Software Engineer

Project Sportradar

Technologies Golang, gRPC, Kubernetes, Redis

Live sports data and odds, distributed in real time to streaming and betting platforms.

Responsibilities

- Implemented data synchronization services in Golang, gRPC streams, and Kubernetes, keeping latency low across the sports streaming and odds distribution path.

08/2022 –
07/2023

Endava — London, UK

Senior Software Engineer

Project CSFN (Cisco)

Technologies Golang, Kubernetes, Helm charts, ArgoCD, AWS, gRPC, Postgres, Redis

Cisco Secure Firewall Cloud Native — the firewall and VPN Cisco ships as an appliance, delivered instead as a Kubernetes service on AWS.

Responsibilities

- Led the engineering team developing Kubernetes Operators for Cisco Secure Firewall Cloud Native to automate lifecycle, resource management, and security policies.
- Designed an Operator that wires AWS Shield into newly deployed services.
- Tightened access control in Kubernetes RBAC and AWS IAM.

11/2021 –
07/2022

Endava — London, UK

Senior Software Engineer

Project Agilent

Technologies .NET, TypeScript, Angular, Windows Embedded

Custom software for Agilent's laboratory instruments, used for chemical analysis — from fuel and oil quality testing to cancer research.

Responsibilities

- Developed .NET microservices deployed on Windows Embedded hardware inside laboratory instruments.
- Built Angular interfaces for custom chemical analysis workflows.

EARLIER ROLES

06/2019 – 11/2021	Mistral — Sarajevo, Bosnia and Herzegovina MTVO (Masters of Void Organization) A virtual goods trading platform built around spiritual sessions, with each session tracked as it runs. .NET, TypeScript, Angular, AWS, WebSockets, Redis, MSSQL
03/2018 – 05/2019	MOP — Sarajevo, Bosnia and Herzegovina NAGA Online crypto exchange platform. Golang, Kubernetes, RabbitMQ, WebSockets, AWS, Redis, Postgres, Cassandra, gRPC
05/2015 – 08/2017	Imel d.o.o. — Lukavac, Bosnia and Herzegovina Android + backend Logistics tracking and dental monitoring platforms — the Android apps and the backends and mobile APIs behind them. PHP, Laravel, AngularJS, Linux, WebSockets, Android, MySQL, SQLite
