WORK EXPERIENCE

11/2025 –
Present

Evoila — Mainz, Germany

Senior Software Engineer / Infrastructure Automation Specialist

Project Self-service VM provisioning on VCF Automation 9 (Broadcom Professional Services)

Technologies Typescript, VCF Automation 9, vRealize Orchestrator, NetBox IPAM, Claude Code

Responsibilities

- Implemented a self-service VM provisioning catalog on VCF Automation 9 (formerly Aria Automation) — 20+ Orchestrator actions, workflows and configuration elements on a dynamic request form and Kubernetes-native VM deployment.
- Automated IP address management against NetBox IPAM and vCenter — live IP availability, hostname generation with uniqueness validation, and event-driven IP registration after deployment (via VCF Automation subscriptions).
- Improved shared, reusable TypeScript automation libraries and built a generic, strongly typed configuration layer on top of them, turning environment-specific mappings into configuration instead of code.

Senior Golang Engineer

Project TVM (TradeView Markets)

Technologies Golang, Typescript, Vue, Nuxt, Aeron, Postgres, ClickHouse, FIX, Claude Code

Responsibilities

- Engineered a sub-millisecond, low-latency online trading backend in Golang with zero-allocation memory patterns in hot execution paths.
- Implemented ultra-low latency inter-service communication using the Aeron messaging protocol.
- Integrated multiple Liquidity Provider (LP) APIs for real-time automated order routing and execution.

Evoila — Mainz, Germany

Senior Cloud Native Engineer

Project MFC (MultiFeedCenter)

Technologies dotnet, Kubernetes, Helm charts, ArgoCD, GCP, RabbitMQ, MongoDB, MySQL, Postgres, Claude Code

Responsibilities

- Built asynchronous .NET microservices to stream and reconcile data feed providers, improving data accuracy and reducing processing latency.
- Designed GitOps CD pipelines via ArgoCD using the app-of-apps pattern to automate and streamline multi-service Kubernetes deployments.
- Deployed a complete Kubernetes observability stack (Grafana, Loki, Prometheus, Elasticsearch, OpenTelemetry Collector) for distributed tracing and monitoring.
- Configured and integrated Keycloak IAM SSO across Grafana, ArgoCD, and backend services (.NET).
